

A fast growing start-up is looking for an Algorithm developer with experience in Computer Vision.

Description:

A fast growing start-up in Herzelia Pituach, developing cutting edge user interface technologies, is looking to hire an algorithm developer in the field of image/video processing.

The algorithm developer is expected to participate in all R&D stages, from algorithmic research, to real-time implementation.

Deep knowledge and experience in image/video processing is required.

Responsibilities:

- Research, design, development and implementation of Computer Vision algorithms.

Requirements:

- M.Sc. degree (Ph.D. preferred) in the field of computer vision/machine learning.
- Excellent C++ and Matlab programming skills.
- 2 years of experience in image/video processing.

Advantage for knowledge in object tracking/segmentation/stereoscopy.
