### **OpenMP - In Practice**

OpenMP is an API for writing multithreaded, shared memory parallelism in C, C++ and Fortran (We shall stick with C/C++). It consists of a set of compiler directives none intrusive to the original serial code. In addition, I shall present parfor concept in MATLAB which is useful where you need many loop iterations of a simple calculation.

**The lecture will be held on Sunday, 11.12.2016, at 13:30, Taub 337**

**הזמנה זו מהווה אישור כניסה עם רכב לטכניון**
