Knowledge Exchange

KE connects teachers and students together. It also gives the opportunity for teachers to learn from students and for students to teach teachers.

In the "Teach" Tab, the user can look at posts by other users. These users are looking for a teacher. Clicking a post will give the user more description about it and will grant the user the ability to send a "I want to teach you" Notification. After pressing the yellow button the other user will get a message in his inbox with the request to teach.

Adding a new post:

In the "Learn" Tab you can search for teachers by entering a subject you wish to learn. After picking your teacher you can either call him or email him to start your lessons.

Pick which subjects you are willing to teach.

A navigation drawer to make things easier and more reachable.
