Lockerino is a smart lockers system.

Lockerino allows you to purchase lockers and use your smartphone as the key.

The system is safe and encrypted, and will alert you in case anyone tries to break into your locker.

Using a Wi-Fi Module

Using a Servo for the lock

Open locker with NFC

Safety door switch

Using a Servo for the lock

Application:

Lockerino
Store your items, the smart way

Hello, yuval
My Locker

Choose a locker:
