Pick your tune ➞ pick the peg you want to tune ➞ Launch it!

Automatic guitar tuner tunes your guitar automatically, according to your requested song or tuning configuration.

Choose how to tune:
Default configuration, or go to songs library.

In our Azure library, you can choose any song to tune by, or add one.

Pick a string, attach the tunerino to the peg, and click ‘Tune’!
Now the tunerino tunes the chosen string.

The chosen string is now tuned.
You can tune the remaining strings, and you good to go!
