E-Ingredient Revealer

You want to eat healthy. You even read the ingredient list – but it is encrypted. Is E102 healthy? And what about E100? Is there a difference (YES!)

E-Ingredient Revealer will tell you all information you need.

All you need to do is to take a picture of the ingredient list. Everything else is done by the app.

The app will show you a list of the ingredients, their health impact (E102 is bad, E100 is OK). If you want, you can click of an ingredient and read more about it, and its associated risks.
