The Newton International Fellowship scheme, run by The British Academy, The Royal Academy of Engineering and The Royal Society, aims to attract the world’s best postdoctoral researchers to the UK. The two-year Fellowships cover the broad range of the natural and social sciences, engineering and the humanities. Funding for follow-on activities will continue for ten years after the Fellowship ends, to enable Newton Fellows to build long-term links with the UK. In addition, Newton Fellows will also become members of the RCUK international alumni scheme.
