The diagram shows a flowchart of courses and their dependencies. Each node represents a course with its credit points (3.0, 5.0, etc.), and the arrows indicate the sequence in which the courses must be taken. The flowchart is in Hebrew, and it details the course sequence required to follow the program in the Faculty of Computer Science at the Technion. The diagram includes specific courses, their credit values, and their dependencies, ensuring that the student progresses through the program systematically.

The diagram is a map of the curriculum, showing how courses are interconnected, with some courses being prerequisites for others. The flowchart is designed to help students understand the required sequence of courses to complete their studies successfully.

The text in the diagram is in Hebrew, but the flowchart visually communicates the academic plan without relying on textual descriptions.
