Call for summer intern candidates at Yahoo! Labs, Haifa

Timeline:
- Applications (with CVs in English) in by March 15
- Interviews: March 25-29
- Notification: April 15
- Internship: 13 weeks during Summer 2012

Position requirements:
- Currently enrolled as a PhD student at a university
- Proven publication record in leading conferences/journals
- Strong coding capabilities in Java/C++
- Good communication skills and a creative mind
- Scientific background in areas of interest to Yahoo! is an advantage
- Industrial experience is an advantage
- Familiarity with MapReduce/Hadoop a plus

Internship goals:
- The successful candidate will work with Y! Labs scientists and engineers on research projects stemming from real-world Web challenges. This will require both solid development skills and superior analytical skills in order to formalize novel models and approaches at the cutting edge of Internet Science. A successful summer internship will include the submission of at least one paper to a leading conference such as WSDM, WWW, SIGIR, KDD or ACL.
