Data Scientist

If you like taking your research and turning it into actual products, this job is for you.

The data science office at HP Software is looking for data scientists to join the team.

The role is to suggest innovative ideas in the area of data analytics/machine learning, design, prototype and help the R&D organization in their development.

Requirements:

- PhD or MSc in the area of machine learning / data analytics / data mining
- Hands on programming experience at the prototype level
- Ability to mentor others in the development of products
- Innovative thinking

The position is located in Yehud
