Google R&D Center in Israel is looking for part time student for an intern role.

Please read the job description below and fill in this form.

Google staffing team will reach out to the most relevant candidates for this specific role.

**Job description:**

The area: Intern - Technical

Google is and always will be an engineering company. We hire people with a broad set of technical skills who are ready to tackle some of technology's greatest challenges and make an impact on millions, if not billions, of users. At Google, engineers not only revolutionize search, they routinely work on massive scalability and storage solutions, large-scale applications and entirely new platforms for developers around the world. From AdWords to Chrome, Android to YouTube, Social to Local, Google engineers are changing the world one technological achievement after another.

**The role:** 2013 Software Engineer Intern - Haifa or Tel Aviv

Google's software engineers develop the next-generation technologies that change how millions of users connect, explore, and interact with information and one another. Our ambitions reach far beyond just Search. Our products need to handle information at the scale of the web. We're looking for ideas from every area of computer science, including information retrieval, artificial intelligence, natural language processing, distributed computing, large-scale system design, networking, security, data compression, and user interface design; the list goes on and is growing every day. As a software engineer, you work on a small team and can switch teams and projects as our fast-paced business grows and evolves. We need our engineers to be versatile and passionate to tackle new problems as we continue to push technology forward.

As a key member of a small and versatile team, you design, test, deploy and maintain software solutions.

**Requirements:**

1. Msc student or Bsc student (3rd year)
2. Familiar with JS and web programming.
3. Previous work experience
