Graduate Software Engineer – Secure Access and Mobility Group
Location: Netanya, Israel

Cisco is the worldwide leader in networking technologies that transforms how people live, work, play and learn with a very rich portfolio of products and services, around three major architectures: borderless networking, collaboration, data center virtualization. It's an exciting time to work at Cisco. Every day we connect people to the network and make it come to life. Whether it's using e-learning to educate students far from city centers or downloading the entire Library of Congress in seconds, our networking technology has not only revolutionized the way people do things, but who they are.

The Opportunity:
Cisco is looking to recruit a software developer to be a part of the success of the Identity Services Engine (ISE) product evolution and work on development of the ISE server, and be part of a highly driven, talented engineering team.

ISE is a next-generation identity and access control policy platform that enables enterprises to enforce compliance, enhance infrastructure security, and streamline their service operations. The unique architecture of Cisco ISE allows enterprises to gather real-time contextual information from networks, users, and devices. The administrator can then use that information to make proactive governance decisions by tying identity to various network elements including access switches, wireless LAN controllers (WLCs), virtual private network (VPN) gateways, and data center switches. Cisco ISE is a key component in BYOD solutions at Cisco and is built on the foundations of ACS – the industry leading AAA solution.

The successful candidate will have most of the following skills:
- Hands on coding in C++, Java
- Knowledge of OOD and OOP with design patterns
- Knowledge of multi-threaded development
- Fast learner, versatile, an independent thinker
- Strong communication skills, team player
- Be self-motivated with a strong desire to learn and innovate

The following skills would also be advantageous:
- Network protocols, network security and cryptography
- Development and debugging in Linux environment
- Good English skills, both written and oral

Education Requirements:
- The ideal candidate will be a graduate in computer studies, Bsc or higher degree is preferred
