**Software Developer (Student position) – HPAi Decision Application Platform**

**General Description**
The HPAi Applications group is developing next generation HANA applications and platforms which unleash the power of HANA as an in-memory DB platform.
The Decision Application platform is targeted to provide real time decision making and analytics on top of HANA DB.
We are looking for talented students who will take part in a team developing Backend & Frontend services and functionality for our product.

**Job Description**
- Develop in complex frameworks working with HTML5, JavaScript, SQL Script and more.
- Work in a full life cycle methodology, from design to implementation and testing of the product.
- Be part of a scrum team and work in close collaboration with the developers and Product Owner.

**Job Requirements**
- Education: Computer Science student or equivalent.
- High grades from a known institution.
- Minimum 3 semesters remainder as a student.
- Fluent English.
- Knowledge of SQL, HTML5, Javascript – an advantage.
- Excellent communication skills & team work.
- Willing to work at least 3 days a week in flexible hours (Sunday – Thursday). We show flexibility during the examinations term.
- Ability to learn new technologies in a short time.
- Ability to work independently and respond to multiple and conflicting requests under tight deadlines and in a dynamic working environment.

**Additional Information**
- Be Proactive, Assertive and Open-minded with high problem-solving capabilities.
