Accelerate your career as you help reinvent the value and impact of information for business everywhere. At EMC, we are leading customers on their journey to cloud computing by enabling them to store, manage, protect and analyze their information assets in a more agile, trusted and cost-effective way. If you are passionate about technology and want to be part of the information management revolution, join more than 50,000+ EMCers around the world who are leading the journey to the cloud.

About ScaleIO:
ScaleIO is the leading Software Defined Storage solution in the world. Deployed on commodity servers, ScaleIO creates a single-layer, enterprise-grade storage product which is elastic and delivers linearly scalable performance. Its scale-out server SAN architecture can grow from a few to thousands of servers. ScaleIO was founded by storage veterans each with more than 15 years in the storage market, developing high end storage solutions for the leading vendors. ScaleIO was acquired by EMC in July, 2013. It operates as an independent business unit within EMC, giving it a unique combination of start-up culture and agility, with the financial backing, stability, and resources of the world’s #1 data storage company.

ScaleIO R&D main offices are located in Haifa & Herzliya

Student for Core Development (ScaleIO, Haifa)
EMC - ScaleIO is looking for a Student for Core to help drive our ground breaking software defined storage technology. This is a great opportunity to be involved in revolutionizing the high-tech storage industry by delivering a disruptive product.
This position involves being part of a growing engineering team responsible of building a new storage product from the very beginning. The team will mainly focus on independently developing enterprise storage features, resolving technical issues and conducting research activities. Your responsibilities will include end-to-end product development.

Requirements
- A student in Computer-Sciences/SW-Eng/Mathematics with high grades and about 18 month to graduation.
- Please attach Grades!

Advantages:
- Experience in data structures algorithms
- Experience in C/C++/ JAVA/ Python/ Perl
- Quick learner
- Takes initiative

Student/Junior SW Engineer (ScaleIO, Haifa)
EMC - ScaleIO is looking for a Student/Junior Core SW Engineer to help drive our ground breaking software defined storage technology. This is a great opportunity to be involved in revolutionizing the high-tech storage industry by delivering a disruptive product.
This position involves being part of a growing engineering team responsible of building a new storage product from the very beginning. The team will mainly focus on independently developing enterprise storage features, resolving technical issues and conducting research activities. Your responsibilities will include end-to-end product development.

Requirements
- A student in Computer-Sciences/SW-Eng/Mathematics with high grades from a well-known university.
- For students- 18 month to graduation graduate with high grades
- Please attach Grades!
- Experience in working in a multi-threaded and distributed environment an advantage
- Deep understanding of threading and locking mechanisms
- Design and implement software in the highly parallel and distributed environment of the product’s core
- Experience with storage and/or networking is a big advantage.
