Technion – Israel Institute of Technology
Jacobs Technion-Cornell Innovation Institute (JTCII)
Faculty Hiring – New York City

Tenure-track Faculty Position, JTCII at Cornell Tech, New York City

Multiple tenure-track faculty positions are available at the Jacobs Technion-Cornell Innovation Institute (JTCII), a key component of the new Cornell Tech graduate-level campus in New York City. Cornell Tech is revolutionizing academia's approach to entrepreneurship and its interaction with industry. The activities at JTCII currently focus around three research hubs: Connective Media, Healthier Life, and Built Environment.

We are interested in exceptional applicants from any area of engineering, computing, and information-driven fields related to JTCII's current research hubs. We seek individuals who have exceptional academic records and demonstrated engagement and impact outside the academic world. Applicants must hold a Ph.D. and have the ability to conduct outstanding research and provide education at the level of faculty at top US and Israeli institutions. Suitable applicants will also have a strong interest (and demonstrated record, depending on seniority) in the technology commercialization and entrepreneurship mission of JTCII.

Faculty hired in these positions will be appointed via the Technion at the Assistant, Associate or Full Professor level and academically affiliated with a relevant Technion department, but permanently located in New York City. The Technion departments relevant to the three JTCII hub areas are Computer Science, Electrical Engineering, Industrial Engineering and Management, Civil and Environmental Engineering, Architecture and Town Planning, Biomedical Engineering, Mechanical Engineering and Medicine. Candidates with a fit to any of these departments will be considered.

We will begin reviewing and interviewing candidates immediately and continue until the positions are filled. Applicants should submit a curriculum vita, brief statements of research and teaching interests, and the names and contact information of at least three references. The research statement should explicitly describe also the entrepreneurial and commercialization aspects of the applicants' research. Applications should be made online at:

https://academicjobsonline.org/ajo/jobs/2650

Technion – Israel Institute of Technology is Israel's premier technical university. It is widely considered to have significantly contributed to the emergence of Israel as a global technological leader. The JTCII is a joint venture of the Technion and Cornell University, combining the strengths of both institutions. It is a key component of the Cornell Tech campus in New York City, where these faculty positions are located.
