MedBuddy
Online realtime care taking system

Patient reports his activities and conditions

Report → Sync → Show

Server

Android App

GCM/HTTP

Web frontend

AJAX

Doctor can track and analyse patient’s condition

Do not forget your medicine!

Plans for future development:
1. Patient should enter prescriptions by himself
2. Multi user web support
3. Care takers support
4. Private data encryption
5. Hardware support for automatic measurements/reports

Yearly Project 2013, group 5
