236862 – Course Exam

Sparse and Redundant Representations and Their Use in Signal and Image Processing

January 25th 2016, 09:00 – 11:00
Location: Taub 8 & 9

Lecturer: Michael Elad

Instructions:

- There are 24 equally-weighted questions in this exam.
- Each question gets a grade in the range [-2,5].
- This means that if you are not sure, you should skip this question.
- Note: you have to answer 20 questions correctly in order to get 100.
- Any grade above 100 will be considered as 100.
- Please MARK in the box per question if you do not want to answer it.
- This exam checks your general knowledge. The answers should be very short, and the space given should be more than enough.
- This exam is done without reference material.

Good Luck.
