Dear Prof. Makowsky,

as I leave for Canada on March 9. 1998, I would like to summarize our agreements concerning my research from December 1995 till March 1998 under your supervision and our joint writing of its results.

- The paper [Char2] The Complexity of Schur Functions in Finite Fields of Characteristic 2 (May 1997, revised December 1997) is submitted to Computational Complexity and I leave it to you to revise it according to the requests of the referees.
- The paper [Char3] Computing Permanents over Fields of Characteristic 3: Where and Why it Becomes Difficult, (December 1997) is submitted to Computational Complexity and I leave it to you to revise it according to the requests of the referees.
- If the editor of Computational Complexity insists in joining the two paper [Cahr2] and [Chra3], or request other reoroganization, this is fine with me.
- The paper [Borch] on Borchardt (Cauchy) and other structured matrices is in preparation and I leave it to you to complete the paper from my notes and your notes from my presentation and to submit it to a journal of your choice.

Sincerely

G. Kogan
