

The Changes in Step Parser

- a. The following original parser classes were changed to inherit from AddInfo class
 1. ModuleExpr
 2. CaseDistinction
 3. Expr
 4. Type
 5. Fts
 6. Rho (Relation of transition class)
 7. Tau (Transition class)
 8. Mts
- b. Added new function setName to Var.java
- c. At "Var" class new names for mode Images:

```
public static final String modeImages[] =
{
    "",
    "local",
    "in",
    "out",
    "external-in",           // originally was "external in"
    "external-out"          // originally was "external out"
};
```
